### **PRICE LIST**

*Effective as of January 1, 2009*

#### **Test-mate ChE Cholinesterase Test System (Model 400)**

The Test-mate ChE System is for in vitro diagnostic use for the quantitative determination of both erythrocyte cholinesterase and plasma cholinesterase in whole blood to monitor pesticide exposure. This system is for laboratory use by trained laboratory technicians only. This system is for use only with the AChE Assay Kit and the PChE Assay Kit and is not intended for use with any other assay or reagent kit.

The Test-mate ChE System includes: hard-shell storage case, photometric analyzer with battery, reagent tool, assay tube rack, one AChE Assay Kit to perform 96 erythrocyte cholinesterase tests and a detailed instruction manual.

Test-mate ChE System	\$2480.00
----------------------	-----------

#### **AChE Erythrocyte Cholinesterase Assay Kit (Model 460)**

The AChE Assay Kit is for in vitro diagnostic use for the quantitative determination of erythrocyte cholinesterase in whole blood to monitor pesticide exposure. This kit is for laboratory use by trained laboratory technicians only. This kit is for use only with the Test-mate ChE System and is not intended for use with any other testing equipment.

The AChE Assay Kit will perform 96 erythrocyte cholinesterase tests. The kit includes: assay buffer tubes, premeasured single-test reagents, blood sampling capillaries, sampling capillary wipes, dropper bottle of distilled water, transfer pipettes, 9 Volt battery and a detailed package insert.

AChE Assay Kit	\$400.00
----------------	----------

#### **PChE Plasma Cholinesterase Assay Kit (Model 470)**

The PChE Assay Kit is for in vitro diagnostic use for the quantitative determination of plasma cholinesterase in whole blood to monitor pesticide exposure. This kit is for laboratory use by trained laboratory technicians only. This kit is for use only with the Test-mate ChE System and is not intended for use with any other testing equipment.

The PChE Assay Kit will perform 96 plasma cholinesterase tests. The kit includes: assay buffer tubes, premeasured single-test reagents, blood sampling capillaries, sampling capillary wipes, dropper bottle of distilled water, transfer pipettes, 9 Volt battery and a detailed package insert.

PChE Assay Kit	\$400.00
